

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

No official reports from Chile have been received since my last report.

#### PHILIPPINE ISLANDS.

##### *Reports from Manila—Inspection of vessels—Smallpox.*

Chief Quarantine Officer Heiser reports, February 28 and March 7, as follows:

Week ended February 23, 1907. No quarantinable diseases reported for the city of Manila. During the week consular bill of health was issued as follows:

On February 19 the British steamship *Schuytkill*, with 50 crew, was granted an original bill of health for Boston and New York via Cebu, P. I., after the usual inspection. Miscellaneous cargo certified, 7,986 packages.

Week ended March 2, 1907. The only quarantinable diseases reported for the city of Manila were 2 cases of smallpox, with no deaths. During the week bills of health were issued to vessels clearing for United States ports as follows:

On February 25 the British steamship *Antiochus*, with 85 crew, bound from Japan ports to Cebu, was granted a bill of health after the usual inspection.

On March 2 the British steamship *Indrasamha*, with 63 crew, en route from Yokohama to New York, was granted a supplemental bill of health after inspection of cargo and personnel.
